ABOUT

Innovative Full Stack Developer with 3+ years of experience developing secure, scalable applications. Currently contributing to high-performance systems by delivering user-focused solutions and optimizing workflows to improve efficiency and reliability, with a strong commitment to continuous learning in AI and modern software development practices.

WORK EXPERIENCE

Full Stack Developer **SEP 2024 - PRESENT**
Tenant India Pvt Ltd Bengaluru, India

- Contributed to Consumer & Revenue Management platforms by developing scalable features using Node.js, Vue.js, and MySQL.
- Optimized backend business logic across Lead and Revenue modules, improving system efficiency and performance.
- Developed the Superlease document feature, enabling automated document generation and real-time updates at the property level.
- Implemented a bulk “Select All” feature, enabling large-scale operations and reducing manual effort across datasets.
- Implemented reusable Vue components, reducing redundant UI code and improving development speed across modules.
- Developed automated validation scripts for backend workflows, reducing manual verification effort and improving deployment confidence.
- Implemented HB Alchemy-based database migration pipeline, eliminating manual script execution and ensuring consistent, automated schema deployments across environments.
- Leveraged AWS S3 logs, Grafana, and New Relic to monitor system behavior, analyze performance issues, and resolve critical production incidents efficiently.
- Collaborated using GitHub for version control, code reviews, and deployments to ensure code quality and reliability.

Associate Software Engineer **MAR 2024 - AUG 2024**
Brillio Technologies Bengaluru, India

- Developed a Customer Support Dashboard using React and Spring Boot within a microservices architecture for tracking and visualizing operational metrics.
- Designed and implemented backend services with focus on scalability, reliability, and maintainability.
- Improved code quality and system stability using SonarQube analysis and JUnit-based unit testing, ensuring consistent release quality.
- Worked in an Agile environment, actively contributing to sprint planning, development, testing, and deployment cycles.
- Utilized AWS services and monitoring insights to support application stability and resolve issues during development and testing phases.
- Completed the LBJ (Learn Before Joining) Program, gaining hands-on experience in AWS, Web Development, MySQL, Agile practices, and Data Structures & Algorithms.

React Developer Intern **SEP 2023 - MAR 2024**
TMI Group Hyderabad, India

- Developed responsive and reusable frontend components using React.js, HTML, CSS, and JavaScript, ensuring consistent UI across multiple modules.
- Built dynamic web applications by integrating RESTful APIs, enabling real-time data fetching, processing, and display.
- Improved application performance by optimizing component rendering, reducing unnecessary re-renders, and enhancing overall user experience.
- Collaborated with backend teams to ensure smooth API integration, proper data flow, and efficient error handling.

CERTIFICATIONS

- AI For Everyone (Coursera)
- UX Foundation Learning Journey Certificate (Adobe)
- AWS Certified Generative AI Developer (LinkedIn)
- AWS Essential Training for Developers (LinkedIn)

EDUCATION

Bachelor's in Technology (B.TECH) in Artificial Intelligence **8.82 CGPA, 2019-2023**
Anurag Group of Institutions

SKILLS

Algorithms | Data Structures | Object-Oriented Programming (OOPS) | C | Python | Java | JavaScript | SQL (Query Language) | HTML | CSS | Bootstrap | React JS | Vue JS | Angular | NodeJS | Spring | Spring Boot | Django | RESTful API | WebSockets | RabbitMQ | Integrating SDKs | MySQL | PostgreSQL | Redis | ORM | Microservices | AWS | GitHub | GitLab | Figma | Power Automate | Agile | JSON | Basic Linux / Unix commands | OpenAI Gen AI | Debugging Codebase | Prompting | Communication | Teamwork | Organizational Skills | Decision Making
